SUMMARY

Full-stack Software Engineer with 6+ years at Meta across growth, consumer product, and platform teams. Track record of owning features end-to-end, from experimentation and design to launch and iteration, across multiple high-scale product areas. Experienced working closely with product, design, and data science in cross functional agile teams.

SKILLS

Languages: Python, Hack/PHP, JavaScript, Java, C++, SQL, R, MongoDB

Frontend: React, GraphQL, HTML/CSS, React-Native, Ajax

Backend & APIs: Node.js, REST

Cloud & Data: AWS, PostgreSQL, Docker

Product & Process: A/B testing, feature flags, experimentation, PRD review, funnel analysis, dashboards

EXPERIENCE

Meta April 2020 - Present · 6 yrs

Software Engineer - Applied AI April 2026 - Present

- Building the next generation of frontier models.
- Leading happy hours for women and AI reading groups

Software Engineer - VR & Horizon Travel July 2023 - April 2026 · 2.5 yrs

Getting users together in 3P apps and metaverse

- Owned Destination-Centric-Invites end-to-end; collaborated with 10+ XFN resulting in 1.5% increase in Horizon Time-Spent.
- Scaled the invite system into a robust state management system to rapidly deliver 8 products.
- Led technical design for travel errors with PM and design; reduced error rate by 5%
- Mentored 4 junior engineers through promotion cycles; conducted 10+ engineering interviews.
- Reduced on-call load from 25 hours/week to 5 hours by creating an AI on-call bot.

Software Engineer - Social Graph & Privacy Settings Jan 2021 - June 2023 · 2.5 yrs

Expanding user graph and providing profile settings.

- Migrated 2.2 million Oculus Accounts from Friends Model to Follow Model.
- Drove 0.54% (+16K) increase in iFollows through A/B tests and optimized product performance.
- Refactored old Privacy System to new model; improved user understanding through tooltips and upsells.
- Shipped Privacy Settings for Parents-managed teen accounts impacting 40K+ accounts.

Software Engineer - Growth June 2020 - Dec 2021 · 1 yr

User acquisition, monetization, engagement, and retention experiments

- Built growth experiments across the funnel; 2.43% (+20K/month) increase in Monthly Active Buyers.
- Shipped Incentive Engine that became a core part of the monetization loop and avoid low-ROI incentives.

New York State Department of Health - Software Engineering Intern May 2019 - Aug 2019

- Implemented threading within BCI2000 software to improve CPU utilization. Integrated BCI2000 with PsychoPy for usability by neuroscientists. Debugged and fixed bugs in signal processing module of BCI2000 to improve acquisition.

EDUCATION

M.S. Information Technology 2018 - 2019

Rensselaer Polytechnic Institute (RPI), Troy, New York · GPA: 3.9

- Teaching Assistant: Introduction to Computer Science (1 semester, 70 students) and Introduction to IT and Web Science (2 semesters, 90 students): led lab sections, held office hours, mentored students.

B.E. Computer Engineering 2014 - 2018

Shri Govindram Seksaria Institute of Technology & Science, India
